EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Karl F. Milde on 10/30/2009.

The application has been amended as follows:

Claim 34 has been amended, claims 58-63 have been cancelled, and claim 64 has been added:

34. A device for trimming a lip of a windshield wiper blade, said device comprising, in combination:

a basic body with a longitudinal passage having a longitudinal entrance extending the length of said passage;

a first wiper blade guide disposed adjacent the entrance to said passage, said first wiper blade guide comprising two longitudinal webs arranged on said body on opposite sides of said entrance in facing relationship to each other, for guiding the wiper blade between them; and

a cutting unit disposed in said passage and adjustably mounted in said basic body, said cutting unit including at least one cutting blade defining a cutting plane parallel to the direction of movement of the wiper blade, and a second wiper blade guide disposed in the cutting plane and forming a fixed width channel

Art Unit: 3724

adapted to support and guide on both sides of the lip of the wiper blade during cutting; and

means for adjusting the position of the cutting unit with respect to the first wiper blade guide, [whereby] thereby to set the desired position of the cutting unit [may be set] prior to cutting, said means comprising a stop member, rigidly connected to the cutting unit and protruding from said body, to indicate the depth of cut relative to the first guide.

64. The wiper blade cutting system according to claim 34, further comprising a guide member, rigidly connected to and protruding from the body adjacent the stop member, to indicate the position of the first guide with respect to the stop member.

2. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable for claiming a means for adjusting the position of the cutting unit with respect to the first wiper blade guide, thereby to set the desired position of the cutting unit prior to cutting, said means comprising a stop member, rigidly connected to the cutting unit and protruding from the body, to indicate the depth of cut relative to the first guide.

Wessels (German Patent No. 29806561.7), Belling (U.S Patent No. 3,611,571), and Meitzel (German Patent No. 3510738), Tarpill et al (U.S Patent No. 6,581,291), Freeland (U.S Patent No. 5,848,471), and Diebold (German Patent No. 4110799) teach cutters pertinent to the instant application however none teach the means for adjusting the position of the cutting unit comprising a stop member rigidly connected to the cutting

Art Unit: 3724

unit and protruding from the body to indicate the depth of cut relative to a guide. No teaching can be found to amend any of the aforementioned references to incorporate this feature.

Claims 36-38, 40, 46, 47-49, 56, and 64 are dependent of claim 34 and are therefore allowable.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
